

Berzelius symposium 94

International Conference on
Multidisciplinary approach to
diffuse parenchymal lung disease
1–3 June 2017 in Stockholm · Sweden

The symposium is arranged by the Swedish Society of Medicine in cooperation with the Swedish Society of Pathology · the Swedish Society of Radiology and the Swedish Respiratory Society.
The meeting is supported by MSD and Roche.

Welcome to the meeting on Multidisciplinary approach to diffuse parenchymal lung disease!

This international course is designed to give a review of diffuse parenchymal lung diseases with clinical, radiologic and pathological correlations. The course will run for two and half days and will consist of a series of presentations with corresponding multidisciplinary sessions. The speakers are expert thoracic clinicians, radiologists and pulmonary pathologists. The presentations will illustrate the importance of a multidisciplinary approach to solving difficult problems in diffuse parenchymal lung disease.

This multidisciplinary international course could be one of the very few courses offered in the world concerning this type of disease, giving lectures and practical sessions with very well known lecturers.

By the end of this course the participants should have a better understanding of the importance of correlation between clinical, radiologic and pathologic data in diagnosis and management of diffuse parenchymal lung disease.

Welcome to Stockholm in June 2017!
